MODULAR CLAMPING SYSTEMS

CLAK Quick-Change Jaws

This new patented system allows for the quick change of parallels, angular parallels, V-jaws, soft jaws for any type of workpiece. The benefits are:

- Reduce downtime and set- up time
- Elimination of clamps and locks thanks to the patented self locking system
- Increase the accuracy of finished parts and reduce scrap

All components are case hardened and precision ground. The CLAK system is compatible with MC Vices and the CIVI 2000 workholding system.
